

The Element of Water

Water is the element of emotion, of life, intuition and of the dark primordial places within our soul. The emotions of water are the profound ones, those that stir us to love deeply and to hate coldly. Water soothes and purifies, it washes away all impurity and leaves us ready to heal. The realm of Water is a formless place, the womb of the Mother and a place of insight where we await our rebirth. Whenever you have need of hidden knowledge or caring nourishment, Water will provide the guidance you need.

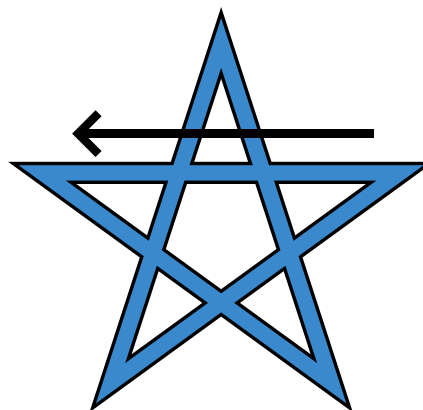

Animal:	Fish and other sea life
