

The Element of Air

Air is a realm of knowledge, of wisdom, of messages, messengers and journeys. It is new ideas and new beginnings. Air is logic, it is sharp like a blade and does not spare feelings. Air is the written word, the poetry but not the passion. Air gives the freedom to fly with precision and understanding. Philosophy and sciences are a part of this realm. Whenever you have the need to follow your head and not your heart, Air will be your guide.

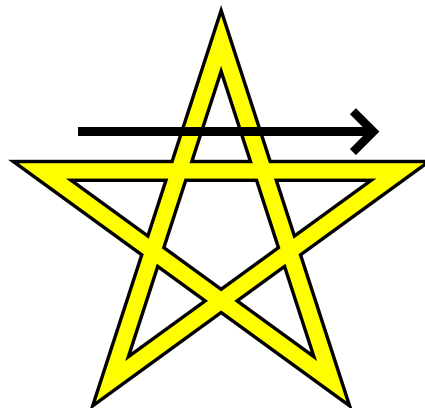

Animal:	Birds
